		these little bugs starting to annoy me and been playing days so many times have been in lobby with someone and played games with them and they have then gone away but it is bugged and their still in my lobby have restarted the game the lobby twice and just nothing	Abc
		they developed unreal engine so they understood how it worked inside out this meant their game had much lesser bugs than the competition pubg which was also developed on unreal engine it also meant they understood how the engine could be leveraged the best	Abc
		they do not wanna pull pubg new state which was released too fucking fast and then was shitty on its first release respawn is looking forward to making it good do you want shitty ass buggy game	Abc
		they have fixed so many bugs at first when the game first released was having few bugs that annoyed me but like weeks later they fixed all of the bugs that were bothering me now rarely come across any bug can tell me what bug specifically have can report it	Abc
		they need to just make pubg people want semi realistic br so badly everything we have now is ability class based with gimmicks get real fps studio to develop so its not buggy mess and update the engine	Abc
		think if you are on motorcycle you should definitely still fall off aside from side car if you are on the back of buggy you should fall off and last but not least if you are leaning out of window shooting then you should fall out if youre driving car or passenger stay in	Abc

		think the kill feed is bugged and the nb of kills ui in the middle of the screen after you kill someone is bugged too hot fix maybe	Abc
