| | | dude the problem with crossfirex is beyond buggy the game mechanics suck which unfixable the devs optimize the game for controller at the last minutes crossfirex should not be on console | Abc |
| | | extraction eu dropei mas crossfirex ta fil com alguns bugs na mira das armas | Abc |
| | | fix the bugs in this game and it will grow | Abc |
| | | got to be honest not really found anything special about in what have played so far guess it kind of works as fps though know people are having issues with bugs but it is all just bit meh | Abc |
| | | had way more bugs crossfirex does however have one particular bug in modern mode that is worse in my opinion it randomly forces me out of ads when fire my gun | Abc |
| | | hasta los momentos cero bug | Abc |

| 참 | crossfireX_open | regarding this new game crossfirex codeveloped by remedy and smilegate do you have any info on this one the game pretty lackluster with limited content but with well fleshed out mtX store beta testers are telling its the exact same buggy unbalanced mp they tested yr.. | Abc |
| | | so while it has some basic day one bugs am having good time so far | Abc |
| | | terrible optimisation poor gameplay average visuals worst aiming have ever experienced yes worse than with shit loads of mtX game breaking bugs crossfirex is everything hate about modern gaming do not waste your time and especially your hard earned money on it | Abc |
| | | that was sound game the vision and ambition of gameplay rests on the devs crossfirex is buggy as well ish graphics | Abc |
| | | the multiplayer in is so poorly optimised in just game have had ads brake on me lag issues and the load out screen bugged and had to quit because it would not let me play this game needed way more time in the oven hopefully the campaign is better | Abc |
| | | to be honest despite its bugs it is always better than crossfirex | Abc |
| | | why why why does games in recent years always have to launch with bugs and freaking problems why why what is the essence of beta test what is the value of that xbox should remove from their pass holy shit garbage | Abc |
| | | xthots would kill right now for that bugsnax meta score | Abc |
| | | yeah but there is this game has lot of bugs but the general experience when it works is great like dying light or cyberpunk and then there is nothing can save this game it is so fundamentally bad it never should have been released like crossfirex | Abc |
| | | you know it is quality product when the eula is bugged and you cannot get as far as the start screen | Abc |
| | | you realize crossfirex had terrible buggy release while sifu is actually pretty smooth and definitely not one and done can tell someone hasnt played it | Abc |

| 참 | crossfireX_1st_patch | based off of what played of the bf beta bugs glitches and all would put that cluster over what have seen of crossfirex which looks insanely generic | Abc |
| | | been playing crossfirex its not buggy at all | Abc |
| | | broken game game breaking bugs so bad bad game is bad do not play this play crossfirex instead | Abc |
| | | cannot believe was nominated for technical achievement at the what did they achieve precedent on how to release bad buggy broken game might as well have nominated | Abc |
| | | crossfire campaign especially operation spectre is one of the best sp story campaigns played just third to halo infinite and resident evil village serious also no bugs am telling people to give this game chance | Abc |
| | | crossfire campaign is greater than hfw seriously no bugs or glitches on crossfire and hfw is full of them | Abc |
| | | crossfire game is way better than hfw that bug infested mess with one of the dumbest stories how in the heck guerilla was manage to make sequel inferior to the first game utterly embarrassing another killzone is horizon | Abc |
| | | crossfire update will add new maps and fix about major bugs | Abc |
| | | crossfire update will add new maps and fix about major bugs via | Abc |
| | | damn so february games be buggy huh crossfire horizon forbidden west now elden ring | Abc |
| | | do not think crossfire was buggy it was just bad | Abc |
| | | dont you think we are hating too much on crossfire went in with low expectations and it is good shooter campaign finished it in day gunplay was good though some bugs yes cyberpunk bad def no | Abc |
| | | eu perco por causa do lag bug time bosta no crossfire | Abc |
| | | evo played crossfire xbox and band of bugs xbox in the last hours | Abc |
| | | finally completed crossfire battle pass season looking forward to march so we can get more balance and bug fix updates as well as new content and modes | Abc |
| | | guy responsible for fixing bugs at remedy for crossfire | Abc |
| | | huge difference ign gave this broken mess an and crossfire campaign in which has no performance issues nor bugs plus it is way better looking and also gameplay wise cyberpunk and crossfire both solid games am like gamespot | Abc |
| | | is it me or is xbots trying to make seem more buggy than at launch that shit sad mean should not they be busy playing the newly released xbox exclusive | Abc |
| | | is wonderful fps game it has the same kind of feel to csgo pvp so if ur fan of csgo highly recommend this game for you if have any bugs or concerns about the game tweet at them im sure they will respond and help out | Abc |
| | | lucky live in us did watch the other collection of the disastorous bugs of hfw clip yet crossfire looks way polished than hfw | Abc |
| | | no presenciei ocorrncia de bugs em halo infinite no no crossfire jogo inteiro um bug hfw sei do que vi na internet | Abc |
| | | not to my knowledge personally just tend to use the whole scale re being broken in the past think it is likely that game scoring that low has bugs crossfire has some too just did not go into it in the review cause there were bigger more core issues to focus on | Abc |
| | | nothing wrong with episodes and we rather have it delayed than to be so buggy we cannot play like crossfire | Abc |
| | | played few matches with today also sent poor dude flying to wall love funny bugs like this | Abc |
| | | response when gamers accuse of being one buggiest unfinished first person shooters ever | Abc |
| | | returnal had bugs in my entire play through that began on launch day horizon have not encountered any bugs yet either wyd buddy you gotta try harder crossfire was the only dumpster fire exclusive released so far | Abc |
| | | so it begins and its bug free single play does not have pop in or weird looking face but it fun am casual | Abc |
| | | started playing the controversially released and apparently buggy it is been years since was sniped through the map half second after the round starts cannot say have missed that feeling | Abc |
| | | the game is not good with or without bugs or glitches crossfire campaign is more interesting and fun oh yeah no bugs give the game chance it might surprise you media are not here to inform us at all they are base in click baiting | Abc |
| | | the multiplayer of crossfire appears to be bland mix of call of duty and counter strike gameplay as someone who is played both do not think the two should ever go together it is only made worse when you throw in pay win microtransactions and bugs and glitches | Abc |
| | | the people bringing up crossfire are just sad what does that game have to do with this horizon having bugs you are allowed to say sony game has bugs and still own the consoles what is with this superiority complex everyone has | Abc |
| | | where are the bugs in crossfire only encountered ever | Abc |
